February 1992

Manweb Internal Telephone Directory

In response to requests received following the production of the Head Office Internal directory, this issue has been punched to allow it to be inserted into existing telephone directory binders.

Additional binders may be obtained as a stationery item and should be ordered on the Stationery Order form under additional items using code TELBK. The binders will then be delivered as part of the order and charged directly to the ordering section.

TELEPHONE DIRECTORY AMENDMENT

To: P A Hunt

Telecommunications Supervisor Room LD40 Head Office

From:

The entry shown against my name in the current
issue of the internal telephone directory is
incorrect and should be amended as follows:-

Page No.

Section

Job Title

Name

Telephone Extn

Room No.

Section No.

Office ID

I N D E X

USING THE TELEPHONE FEATURES

Information in [brackets] is the access code to use.

R = Recall button.

HOLD FEATURES

Consultation Hold [R]

To place a call on hold and consult with another extn. After consulting, the user will automatically be connected to the original party when the consulted party hangs up.

Call Hold [R*9]

To place a caller on hold and hang up without losing the call. Further calls can now be made while original caller is on hold. Dial the access code again to be reconnected to original party.

Call Hold : Flip-Flop [R*1]

Use this feature when receiving call waiting tone, to place the call on hold and immediately connect to waiting party. By using the Recall button you can then alternate between the two calls. It is not possible to connect the two calls together using this feature.

Automatic Call Back On Held Call

An outside call that remains on hold beyond a predefined period of time is automatically recalled to the extn that held the call.

Music On Hold

Callers will receive music whilst on hold at the sites where this facility is available.

USING THE TELEPHONE FEATURES

Information in [brackets] is the access code to use.

R = Recall button.

TRANSFER FEATURES

Call Transfer [R]

This feature allows an extension user engaged in a two-party connection to transfer the other party to another destination anywhere on the internal network. External to external transfer connections are not permitted in the UK.

Call Transfer Security

If an external call is transferred from one extension to another and the second extension does not answer within a predetermined time, the PABX recalls the held party to the extension that originally transferred the call.

CONFERENCE FEATURES

Add-On Conference [R]

This feature allows an extension user to add a third party to an existing two party connection. The three party conference can consist of extensions or external trunks.

Station Controlled Conference [*2]

This feature can be set up on request, ask the help desk 182, and allows up to 7 internal or external (max 3) parties to be connected to a special conference circuit.

USING THE TELEPHONE FEATURES

Information in [brackets] is the access code to use.

R = Recall button.

QUEUING FEATURES

Call Back On Busy

After dialling a busy extension, do not hang-up, wait until the busy tone changes to the special tone then replace handset. When three burst ringing is heard pick up handset and the previously busy extension will be heard ringing. Call back on busy is cancelled if the three burst ringing is not answered by the sixth ring cycle.

To manually cancel dial #1.

CALL FORWARDING FEATURES

Call Forwarding: All Calls [15 + Extn]

All incoming calls to an extension can be diverted to any other 4 digit extension number. As a reminder that call forwarding is activated, one short burst of ringing is heard each time a call is forwarded. A call can only be forwarded one hop.

Call Forwarding: On Busy [13 + Extn]

All incoming calls to a busy extension can be diverted to any other 4 digit extension number. A call can only be forwarded one hop.

Call Forwarding: On No Reply [14 + Extn]

All incoming calls will be diverted to another 4 digit extension number if not answered within approx 20 secs. A call can only be forwarded one hop.

USING THE TELEPHONE FEATURES

Information in [brackets] is the access code to use.

R = Recall button.

CALL FORWARDING FEATURES cont...

Call forwarding on busy and no reply can be active at the same time, provided that forwarding is to the same extension.

Call Forwarding: Return [R10]

This feature allows a forwarded call to be transferred back to the forwarding extension.

Call Forwarding: To Secretary [12]

All incoming calls will be diverted to a predetermined extension number. Ask the help desk on 182 if you would like this facility set up.

Call Forwarding: Cancel [17]

This code will cancel any call diversion.

CALL PICKUP FEATURES

Group Pickup [*6]

A pickup group consists of a number of extensions, within hearing distance of ringing, for which any ringing extension can be answered by any group member.

Directed Pickup [*3 + Extn]

A call can be picked up from any ringing extension providing it can be identified.

USING THE TELEPHONE FEATURES

Information in [brackets] is the access code to use.

R = Recall button.

SPEED CALLING FEATURES

Speed Call Group [61xx, 62xx, 63xx, 64xx]

Frequently dialled numbers can be stored in the system abbreviated library. Eg. At Head Office all the shops can be reached by dialling 63 followed by the shop reference number.

Speed Call Individual [65x]

An extension can store up to 10 frequently dialled numbers for recall from abbreviated library.

Speed Call Program [67 x +No]

To program individual speed call numbers into library.

Speed Call Partner [11]

This feature allows an extension user to dial the most frequently used extension number by simply dialling a short access code. Ask the help desk on 182 if you would like this facility set up.

STATION HUNTING FEATURES

Incoming calls can be made to Hunt over predetermined extensions in a number of different ways.

Hunting is a way of providing one common number for several extensions, it can also ensure that an incoming call is always presented to a free extension.

Ask the help desk on 182 if you require further information.

USING THE TELEPHONE FEATURES

Information in [brackets] is the access code to use.

R = Recall button.

MESSAGE WAITING FEATURES

Message Waiting [*7 + Extn]

This feature activates a special dial tone on the required extension, it is particularly useful if no reply is encountered.

If the busy condition is encountered then dial R*7 + Extn to set message waiting.

Message Waiting Callback [*8]

If you receive the special message waiting dial tone then dial the access code to call the extension that set up the message waiting.

Message Waiting Cancel [#7 + Extn]

The originating extension can cancel a message waiting indication previously set up by dialling the cancellation code.

The callback feature automatically cancels the message when the extension that originated the message is answered.
